Response to Amendment

1. In the amendments filed 1/29/06 and 2/20/07, the following has occurred: claims 51, 53, 56, 71, 73, and 76 have been amended and claims 52 and 72 have been canceled. Now, claims 51, 53-54, 56, 71, 73, and 75-76 are presented for examination.

Allowable Subject Matter

2. Claims 51, 53-54, 56, 71, 73, and 75-76 are allowed. The following is an examiner's statement of reasons for allowance: The primary reasons for the allowance of claims 51, 53-54, 56, 71, 73, and 75-76 is the inclusion of the limitations, in all of the claims, which is not found in the prior art references, of receiving from a buyer computer system a designation of a client computer system to which to deliver a purchased, digital product, forming transaction data by a content manager computer system which binds the transaction to the designated client computer system, and sending, from a delivery computer system, the digital product to the designated client. While the closest prior art (Payne et al., 5,715,314) teaches a method in which a buyer computer, merchant computer, content computer, and delivery computer interact to affect the reservation and purchase of a digital good, Payne fails to disclose or suggest the process of designating, by the buyer computer, a client computer to which to deliver the digital product from a delivery computer as claimed. These features, recited in the particular manner and combination of the claims, in conjunction with the additional limitations describing the method for conducting the purchase and delivery of a digital product, distinguish the claimed invention over the prior art. Additionally, it is noted that claims 71, 73, and 75-76 are directed to a computer readable medium with computer executable instructions for performing these steps. Therefore, claims 71, 73, and 75-76 are distinguished over the prior art for the same reasons.
